EDUCATION

Btech. Computer Science & Engineering
Kandula Obul Reddy Memorial College of Engineering
07/2022 – Expected in 2026

Higher Secondary School
St.Joseph’s Junior College
04/2020 – 05/2022 91.6%

Secondary School
Siddartha English Medium High School
2020 95.5%

EXPERIENCE

AI/ML Intern
SmartInternz (Virtual) May 2025 – Jul 2025

- Built a machine learning web app (**HepaCheck**) to predict liver cirrhosis from clinical data.
- Implemented a full ML pipeline, trained 7 classification algorithms, optimized with GridSearchCV.
- Deployed with Flask for interactive predictions via a web interface.
- Technologies used:** Python – Flask, Scikit-learn, HTML & CSS, Javascript, Git.

ACHIEVEMENTS & CERTIFICATIONS

Aadhya Hackathon 2.0
Organised by RGUKT (IIT) RK Valley 12 hrs
Developed a MERN stack web application, enabling collaboration among university faculty, students and alumni.

Employability Skills – Intermediate
Organised by Wadhwani Foundation 70 hrs
Completed 21st Century Employability Skills Program by Wadhwani Foundation.

Build with India Hackathon
Organised by Hack with India Apr 2025
Participated in Build with India Hackathon, selected among top 5,000 teams out of 25,000 teams.

SELECTED PROJECTS

AI Resume Builder SaaS Application

- Built an AI-powered SaaS Resume Builder with AI tools (Enhance, Generate), and CRUD features.
- Integrated LLM (Gemini API) + NLP scoring engine to analyze resumes for ATS compliance.
- Designed and built with 12+ ATS-friendly templates and 24+ template themes.
- TechStack** – React, Nodejs, MongoDB, Expressjs, Google Gemini (API), NLP, Deployment(Vercel, Render, MongoDB Atlas).

Music Player Android Application

- Built an offline music player with background playback and lock-screen controls.
- Implemented local songs management with metadata and favourites storage (SQLite).
- Applied dynamic UI themes using album art colours.
- TechStack** – Java, Android Studio, MediaPlayer, SQLite Database, Palette API.

Gesture-Based Volume Control

- Developed a real-time system to adjust computer volume using hand gestures.
- Implemented hand detection and finger tracking with Mediapipe and OpenCV, mapping gestures to volume levels.
- TechStack** – Python, Numpy, OpenCV, Pycaw, Mediapipe.
